

2019 STAND-ON MOWER

STARIS

**DURABLE.
EASE OF SERVICE.
COMMERCIAL PERFORMANCE.**

WHY USE A STAND-ON

VERSATILITY AND PRODUCTIVITY

Thanks to their superior maneuverability, Exmark® stand-on mowers are ideal for fenced properties, or lawns with multiple flower beds, irregular shrubbery or tight landscaping. Compared to a walk-behind mower, a stand-on machine is more productive on larger properties. The ease of stepping off the machine quickly to pick up debris, open a gate or move objects also makes this stand-on ideal for landscapers who value productivity.

EASE OF TRANSPORT

Staris® S-Series models feature a large, open platform that folds up and locks, without tools, significantly reducing the footprint of the machine on a truck or trailer. This eases the process of loading and unloading the trailer between jobs, so crews can get from job to job quicker and more efficiently.

COMMERCIAL PERFORMANCE

REDESIGNED FROM THE GROUND UP:

The all-new Staris was built with commercial performance and durability in mind. In a wide range of cutting conditions, Staris models provide increased stability, traction and maneuverability. The engine, fuel tank and tower structure are specifically designed to optimize balance and lower the center of gravity. The frame is constructed of high-strength, 1½- x 3-inch tubular steel with the same wall thickness as Exmark's industry-standard Lazer Z® zero-turn riding mower.

Exmark engineers reinvented the stand-on zero-turn mower from the ground up. The all-new revolutionary Staris delivers the commercial performance, durability, ergonomics and ease of service that landscape professionals need to maximize productivity and profitability. It's impressive list of innovative features include a low center of gravity design, intuitive controls and large open platform.

HEIGHT OF CUT

Operators can quickly and accurately change the cut height by simply raising and lowering the deck.

STABILITY

Engine and operator position, tower structure and fuel tanks are all designed to enhance weight distribution for improved stability and overall performance on the toughest terrain.

INTUITIVE CONTROLS

The ergonomically designed steering system makes operating the Staris easy and the innovative Smart Controller reduces downtime with maintenance reminders and on-screen machine health diagnostics (S-Series only).

PLATFORM SUSPENSION

The innovative operator suspension system features adjustable isolators, which provide custom comfort based on operator preference.

COMPACT DESIGN

The compact size of Staris reduces trailer space and storage and gives you the ability to access more yards, more quickly, while providing exceptional maneuverability on tough terrain.

SERVICEABILITY AND ACCESSIBILITY

All Staris models feature a flip-up front cover and a rear panel that lifts and locks into place. This allows operators easy, tools-free access for routine maintenance and cleaning.

OPERATOR COMFORT

The large, open platform, with a nonslip rubber mat, comfortably positions operators between the drive tires, making them feel integrated into the machine. For maximum comfort, the contoured operator support pad is height-adjustable to operator preference.

COMMERCIAL ENGINE

Staris E-Series models feature proven Kawasaki® V-twin commercial engines. Staris S-Series models offer a choice of carbureted Kawasaki or Kohler® EFI V-twin engines.

DURABILITY

UltraCut Series 3

UltraCut Series 4

ULTRACUT™ DECK TECHNOLOGY

Exmark's heritage with commercial landscapers puts durability at the forefront of our design process. The Staris features Exmark's industry leading UltraCut decks. The UltraCut Series 3 cutting decks is available on the E-Series, with a choice of a 32-, 36- or 44-inch deck. UltraCut Series 4 cutting decks are featured on the large-frame S-Series models with a choice of a 48-, 52- or 60-inch deck. Exmark optimized the frame design and caster wheel positioning for each cutting deck width to deliver a superior quality of cut. The side-discharge UltraCut cutting decks also offer the ability to mulch or bag clippings when equipped with the appropriate accessories from Exmark.

ENGINEERED BY US.
TRUSTED BY LANDSCAPE PROS.
READY TO WORK FOR YOU.

For nearly three-and-a-half decades, Exmark® has been synonymous with the world's most technologically advanced, durable, comfortable and low-maintenance turf care equipment. These are just a few of the reasons why top landscape pros trust Exmark 2-to-1 over the next best-selling brand of zero-turn mowers,* time and again relying on our products to create unmatched results and profit potential. Whether you're a pro, or a homeowner with a lot of lawn to beautify, striving to gain more time for life's most important moments is an aspiration that's shared by everyone—and we strive to make that a reality for you.

2-TO-1 OVER THE NEXT BEST-SELLING
BRAND OF ZERO-TURN MOWERS.

*Based on U.S. Data study by Wiese Research Associates, Inc. Market Share and Additional Equipment Study (February 2016).

WALK-BEHINDS

When designing and building our walk-behind mowers, we did our homework. We packed more technology and performance into each mower. Our mowers deliver precise lawn trimming with versatile handling and reliable quality.

***Parts Plus:** Restrictions apply; please contact your Exmark dealer for further details. Dealer participation is optional. Program not available in Hawaii and Canada.

Products depicted in this literature are for demonstration purposes only. Actual products offered for sale may vary in use, design, required attachments and safety features. We reserve the right to improve our products and make changes in specifications, designs and standard equipment without notice and without incurring obligation. For additional product information including operation manuals, safety materials and warranty details, please visit www.exmark.com or see your dealer for complete details.

Many manufacturers use 100% efficiency ratings for sale purposes. Exmark believes an 80% efficiency rating is more representative of actual mowing conditions, as it allows for turns and

overlapping. Formulas for calculating acres per hour: **100% efficiency:** MPH x width of cut ÷ 99 = acres per hour | **80% efficiency:** MPH x width of cut ÷ 124 = acres per hour
